

# Whole Life Carbon Assessments

**FAIRHURST**

CO<sub>2</sub>

## Why undertake a Whole Life Carbon Assessment?

- Currently a requirement of most Central Government funded and Public Sector projects.
- A positive step towards achieving true Net-Zero in the construction industry.
- Promotes sustainable construction, reuse and future adaptability.
- Identify early opportunities to evaluate and change specifications to reduce carbon emissions.
- Expected to be a requirement for future planning applications throughout the UK.

## What can Fairhurst do?

- Carry out the Assessment in-house for all building and infrastructure projects.
- Identify onerous areas for carbon reduction.
- Recommend alternative materials / systems.
- Provide 3rd Party certification.
